

10<sup>th</sup> March

Dear All

Further to Sue's previous email giving the upcoming dates for the regular testing from Monday 15<sup>th</sup>  
Onwards the testing will take place in St Joseph's ROOM 1,

This is because the main community room is being used for visitors Lateral Flow testing

The room is smaller so only two testing stations will be able to do their test at a time.

The door at the end of the corridor (near the transmission mask) will be left open for you to come in  
that way

You are welcome to take a test home and take your swab at home and drop it to reception (this  
must be at reception by 11am latest)

We would ask that anyone coming over to do their test in SJC comes between 9am and 10.30am

Thank you

*Joanna*
